

SUSEENDHAR T

Full-Stack Developer (React · Node.js · REST APIs · MongoDB)

Chennai, India | tsuseendhar@gmail.com | 9363257559 | susee.dev | [GitHub](https://github.com)

SUMMARY

Full-stack developer building React frontends connected to real REST APIs, with hands-on production experience in QA and development. Currently deepening backend skills in Node.js, Express, and MongoDB — every concept tested on live projects, not isolated exercises. Experience spans web admin portals, React Native mobile apps, and e-commerce API integrations.

EXPERIENCE

QA & Full-Stack Developer — Pentabrain

June 2026 – Present

- Contribute to both QA and development across web and mobile projects, working under the guidance of manager Balachandar.
- Build and maintain KURAL chat (pbchatapp), a React Native/Expo mobile chat application — resolved production issues including profile photo upload bugs, image error fallbacks, and stale state, and managed OTA deployments via EAS CLI (eas update).
- Handle e-commerce integration work on the RiverOft/Lazada platform, including debugging live Lazada Open API errors (e.g. VARIATION_SALEPROP_ATTRIBUTE_INVALID) by cross-referencing GetCategoryAttributes responses to resolve category/attribute mismatches.
- Managed a Lazada policy-violation appeal related to product listing compliance, coordinating the resolution end-to-end.
- Authored and polished QA bug-report documentation for the RiverOFT/Lazada integration into a professional, client-ready format.

PROJECTS

SATS — San Antonio Tamil Sangam Admin Portal — React · REST APIs · MongoDB · Node.js/Express

- Built and maintain the SATS Admin Portal, the admin-facing layer of a three-repo system (API, Web Admin, Web End User).
- Implemented committee member management features using controlled forms, React Router, and Axios-based API integration.
- Resolved a webpack path-resolution issue caused by spaces in image filenames, and improved bundle size using React.lazy() code-splitting.

Personal Portfolio (susee.dev) — Vite · React · Vercel

- Designed and built a responsive portfolio site with a custom particle-canvas background and dark navy/cyan/violet theme.
- Implemented custom typography (Sora, Manrope, IBM Plex Mono, Pacifico) and a hand-built '<TS/>' code-bracket SVG logo.
- Deployed and iterated the site via Vercel, including UI refinements like pill-style buttons and streamlined project cards.

KURAL Chat (pbchatapp) — React Native · Expo

- Developed and debugged a profile photo feature, fixing image error fallback handling and stale state bugs.
- Deployed OTA updates to production using EAS CLI (eas update).

TECHNICAL SKILLS

Languages & Core: HTML, CSS, JavaScript

Frontend: React, React Native (Expo), Vite

Backend & Data: Node.js, Express, REST APIs, MongoDB

Tools & Platforms: Git, EAS CLI, Vercel, Lazada Open API

EDUCATION

B.E. Electronics and Communication Engineering

Paavai Engineering College | Graduated 2026
